

## Managerial Excellence Program

Master the Art & Science of Managing Technical Projects from a Behavioural Perspective

### Program Overview

Managing large-scale projects in a complex business environment, requires more than mere technical skills, it needs project leaders to better understand individual motivations and strengths, team dynamics and more importantly aligning people around a common purpose and vision. This program aims to build competencies to significantly enhance your leadership effectiveness within the context of managing technical projects from a behavioural perspective.

### Who should attend?

For mid to senior level managers or project leads who manage multiple or complex projects.

### How will the participants benefit?

**At the end of the workshop, participants will be able to:**

- Become aware of the art and science of managing projects from a behavioral perspective
- Understand the importance of Emotional Intelligence competencies in managing people
- Get a better understanding of team dynamics & how it impacts performance
- Leverage individual & team strengths to achieve project milestones and accelerate results

### What will the program experience include?

- Pre-work: select readings
- Leadership Competency Assessment
- Peer to Peer feedback led discussions
- Individual Action Plan
- Post workshop Coaching support

**Human  
Network**

Developing People, Accelerating Performance
